

Transform your harvest into a golden opportunity

CLEXTRAL can help transform your cereal grains from fixed-price commodities into value-added products that can improve your profitability and expand your markets.

With a small capital investment, you can turn your harvest into value-added products:

**Breakfast cereals,
Snacks food,
Co-extruded products,
Flat bread,
Couscous,
Pasta products,
Texturized proteins,
Functional Ingredients,
Modified Starch,
Pet foods,
Fish feed.**

Turnkey processing lines from CLEXTRAL can put you on the fast track to success with product development, customized engineering, equipment from raw material handling to final packaging, installation, and training.

CLEXTRAL's ongoing projects include

Food: breakfast cereals, puffed snacks, snack pellets, co-extruded snacks, flat crispy breads, short and long pasta, couscous

Feed: pet food (premium, super premium, treats), fish feed, veterinarian products

Ingredients: functional ingredients, texturized proteins, chemically and mechanically modified starches, precooked flours

CLEXTRAL provides all the elements for product success:

- Return on Investment Studies
- Engineering Studies and Services
- Product Creation and Recipe Development
- All Processing and Packaging Equipment
- Line Installation
- Staff Training
- Comprehensive Service and Support

Serving world markets with a dedication to value and service

At CLEXTRAL, innovation is the driving force of growth. CLEXTRAL utilizes its multi-industry strengths and technologies, relying on worldwide market leadership and a firm foundation of experience, to create, with its clients, the processes and products of tomorrow.

CLEXTRAL develops technologies and designs processing plants on a turnkey basis for the food and feed industry as well as for specific «high technology» niche markets.

CLEXTRAL technology is used throughout the processing lines in many applications, (dosing, mixing, baking, extrusion, drying, and packaging) in 87 countries worldwide.

CLEXTRAL is organized around 3 businesses:

- Twin screw extrusion lines
- Dosing pumps
- Pasta and couscous production lines

From start to finish, CLEXTRAL is your partner in generating profits from grain-based raw materials.
